DETAILED ACTION

Response to Arguments

1. Applicant's response to the last Office Action, filed 11/26/2008, has been entered and made of record.
2. Applicant has cancelled claims 27-52 and added claims 53-65. Claims 53-65 are currently pending.
3. Applicants arguments filed 2/26/2009 have been fully considered.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim(s) 53-65 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. The Federal Circuit¹, relying upon Supreme Court precedent², has indicated that a statutory "process" under 35 U.S.C. 101 must (1) be tied to a particular machine or apparatus, or (2) transform a particular article to a different state or thing. This is referred to as the "machine or transformation test", whereby the recitation of a particular machine or transformation of an article must

¹ *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008).

² *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876).

impose meaningful limits on the claim's scope to impart patent-eligibility (See *Benson*, 409 U.S. at 71-72), and the involvement of the machine or transformation in the claimed process must not merely be insignificant extra-solution activity (See *Flook*, 437 U.S. at 590"). While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform an article nor are positively tied to a particular machine that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. None of the method claims appear to satisfy the machine-or-transformation test. Moreover, a machine is not required by any of the steps. One person can easily select a plurality of texture words to express makeup textures and can draw on a paper graph where the ordinate and abscissa are two different character words. There is no need for a machine to produce a texture image one can get two papers that include the images and overlap them on each other. Therefore, applying makeup with different texture words is not tied to any machine and they are not achieving a transformation that is required by a process claim.

NOTE: Regarding the rejection of claims 53-65, please see the Memorandum dated May 15, 2008, "Clarification of Processes under 35 USC § 101" which may be viewed at the following web address:
